I have reviewed the series of radiographs of the above-mentioned dog which you submitted which were made on April 23rd, 2005 at approximately 17 months and 6 days old. I consider both coxofemoral joints to be within normal limits for a dog of this breed and age.

Thank you for referring these interesting radiographs. If I can be of any further assistance with this case, please do not hesitate to contact me.

Yours Sincerely,
